

# All About: Zing Floor Coating

**Floor Coating** was designed to be used where some burnishing is needed. Is transparent and not easily marked. Fortified with **Zing CPC (Cleaning and Polishing Compound)**. Will produce the safest and shiniest available. To be used on all floor surfaces where coating/finish can be applied.

## Directions

### Stripping Not Required

**Step 1** - When the previous applied coating/finish is in reasonable condition (having at least 3 coats of coating/finish not in need of stripping) prepare floor with **Zing Floor Prep** or **Stress-X** following product directions.

**Step 2** - **CPC** burnish floor follow product directions.

**Step 3** - Vacuum or dust mop.

**Step 4** - Apply a minimum of 2 coats **Floor Coating** with an **All in One Microfiber Mop Applicator**. Be sure each coat is completely dry before applying additional coats. Note: Apply first and last coat to edges only. Remaining coats, stay 1 coat from the edge.

### Stripping Required

**Step 1** - Strip all floor areas, follow stripper label directions.

**Step 2** - Rinse floor.

**Step 3** - Vacuum or Dust Mop.

**Step 4** - Apply sealer if required. 1 coat for floors up to 5 years old and 2 coats over 5 years old.

**Step 5** - Apply **Floor Coating** with an **All In One Microfiber Mop Applicator**. Never apply more than 4 coats in any 24 hour period. Be sure each coat is completely dry before re-applying additional coats. Note: Apply first and last coat to edges only. Remaining coats stay 1 coat from the edge.

## Benefits

- Buffable
- transparent
