
BRITE -N- UP

DESCRIPTION

Compatible with all floor finishes. The sparkling transparent color is the BRITE-N-UP. However, this is just the beginning of a totally new concept in spray buffing. A conventional or high speed floor machine produces a mirror gloss in just half the time. Not only will it take you less time to spray buff an area; you will enjoy the results using this spray buff system.

USE

Spray buffing is a routine maintenance program. BRITE-N-UP is compatible with all floor finishes and can be diluted with water (1 gal. product to 4 gal. water) for a mop on application. It can be used with a conventional or high speed floor machine.
