

■ High flash point

■ Very low odor

■ Safe on plastics

**SOLVENT DEGREASER**

# Asphalt & Tar Remover

**TECHNICAL DATA SHEET**

## Low Odor Solvent Degreaser

### DESCRIPTION

This product is excellent for removing most greases, oils, lubricants, etc. It has low odor and low inhalation toxicity for maximum work comfort and safety. Non-conductive, high flash point, leaves no residue. Safe on ferrous and non-ferrous metals, and on many types of plastics, such as polyethylene, polypropylene, PETE, PVC and electrical wiring. Solv 300 may be substituted for chlorinated solvents in applications below.

### HMIS RATING

### DIRECTIONS

● Cold degreasing: May be used for immersion cleaning in non-agitated vats, circulation-type units, ultrasonic, air-agitated and pressure-spray units. Soak until clean. If desired, remove parts from vat and spray fresh product to flush away dissolved soils. Let product evaporate, or blow dry with air.

● Electrical contact cleaning: May be used to clean electrical and electronic parts and equipment. Safe on electrical wiring. De-energize equipment first and blow dry with air before turning back on. Do not spray on hot surfaces. Do not use on operating equipment that may spark or that has an open flame.

### TYPICAL PROPERTIES

Specific Gravity:..... 0.78  
Dielectric Breakdown  
Voltage: .....29,600 volts  
Flash Point: .....143°F  
Evaporation Rate: .....0.06  
Residue on Drying: .....None  
KB Value:..... 33  
Appearance: .....Clear colorless liquid  
Odor: .....Slight petroleum distillate  
USDA: ..... K-2

### SAFETY

**CAUTION:**  
**COMBUSTIBLE MIXTURE.**  
Refer to M.S.D.S. and product label for additional safety information. Make sure there is adequate ventilation.
