DISAPPEAR

A SELECTIVE BROADLEAF WEED HERBICIDE

LOSE YOUR WEEDS INSTEAD OF YOUR LAWN!

By using this Synergistic Hormone Blend that bathes the leaf, killing broadleaf weeds as well as prostrate weeds – does not injure regular grasses.

DESCRIPTION

This product is a special blend of dominant hormone type, synergistic reacting, Deciduous Weed Killing Chemicals.

The weeds it controls include Buckthorn, Clover, Common Chickweed, Curled Dock, Dandelions,

English Daisy, Ground Ivy, Knotweed, Lamb's-quarter, Mallow, Red Clover, Red Sorrell, Stitchwort, Speedwell, White Clover, Wild Garlic, Wild Onion, Yarrow, plus many others that are common invaders of lawn grasses.

HOW DOES IT WORK?

The unique formulation reacts in many ways so as to produce complete kill of undesirable lawn weeds:

1. Kills DICOT (Broadleaf and creeping prostrate) Weeds.
2. Can be used on regular lawns. DOES NOT INJURE MONOCOT plants (grasses).
3. Unique Killing Action, sprayed droplets land on all leaves. The weed leaves absorb the chemical and it is translocated to all other parts of the plant, including roots, stems and leaves. The entire weed soon withers, dies, decomposes and disappears. No hand weeding or other type of removal is necessary after spraying.
