Quality is Our Most Important Product

INDUSTRIAL DEFOAMER

CONCENTRATED FOAM ELIMINATOR

INDUSTRIAL DEFOAMER is a carefully formulated water based silicone emulsion. The ultra fine silicone particles rapidly eliminate foam and prevent it from forming. This product works well in all water temperatures. Using INDUSTRIAL DEFOAMER allows uninterrupted work and reduces costly equipment repairs. Because of its built in corrosion inhibitors, it is gentle on equipment. This product has been designed to reduce foam build-up in wet vacuum recovery tanks and all foam generating equipment. It reduces strain on motors and it lowers labor costs by eliminating the need to continuously empty the recovery tank. Additional amounts of this material can be added, as needed to control foam. Although designed as a carpet defoamer, it may also be used to defoam other systems such as ornamental fountains and sewer plants.

Benefits

- Labor saving
- Increases equipment life
- Concentrated
- Works well in both hot & cold water

Applications

- Anywhere detergent foaming presents a problem
- Ornamental fountains
- Industrial wastewater treatment plants
- Municipal wastewater plants

Technical Data

Dilution	1/2 oz. per 10 gallons water
DOT	Not regulated
Odor	Bland
pH	4.0 - 5.0
Physical appearance	White emulsion
Pounds/gallon	8.3
