

## TTB4550T

- Patented flip lid-up design for simple and easy brush and pad changes - no crawling underneath.
- Has a 24 volt traction drive system. This was taken directly from the larger 6652 model, providing full variable forward speed control with a single reverse speed
- By virtue of the combination of drive and compactness the machine is exceptionally easy to use for all operators, and the single disc power head allows use of both brushes or pads
- Fully adjustable handle make the machine comfortable to use for any operator
- Patented brush motor pressure
- Inline filter protects motor from debris
- Central Control System
- So compact, so easy to use, for anyone
