WEEDZOUT CONCENTRATE

Economic Control of weeds has been a universal problem for many years. Weeds create fire hazards. Dead and dried weed growth is highly flammable. Weeds increase metal corrosion (around pipelines) and wood decay by holding moisture. Weeds can also provide breeding places for rodents and insects around buildings. Most importantly, weeds interfere with the look that has become so important in presenting a good public image.

Now, you have a product to control the many problems that weeds can cause. Season-long control is achieved without the work and trouble of cutting and mowing. One gallon of concentrate diluted with 10 parts water will effectively treat up to 750 square feet.

This product is extremely desirable in areas where fire hazards are a concern. It's water solubility provides for non-flammable application. Ideal for use around industrial sites, arsenals, oil tank farms, refineries, and lumber yards.

In addition to eliminating mowing and trimming, its ease of application further reduces

labor costs. Can be applied through conventional sprayers.

Conscientious professional handling should be exercised and label instructions should always be followed explicitly.

Physical Data

Color	Light Yellow
Clarity	Clear
Turbidity	None
Odor	Characteristic
Viscosity	1 CPS
Flash Point (Tag CC)	> 212°F
Boiling Point	210°F
Cloud Point Up	> 212°F
Cloud Point Down	< 32°F
Specific Gravity	1.001
WT/Gal	8.34 lbs.
Selectivity	Non-Selective
EPA Reg. No.	2155-100
Residual Action	Excellent
Diluent	Water

FOR COMMERCIAL AND INDUSTRIAL USE ONLY.

No. 6681-0183
